the claims, Nos. _____

☐

the drawings, sheets/figs _____

☐the sequence listing (*specify*): _____☐any table(s) related to the sequence listing (*specify*): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-21</u>	YES
	Claims		NO
Inventive step (IS)	Claims	<u>1-21</u>	YES
	Claims		NO
Industrial applicability (IA)	Claims	<u>1-21</u>	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

Documents cited in the International Search Report:

D1: US6594250

D2: WO02096149

D3: US6038238

D4: WO0191495

D5: "Efficient broadcast frequency utilization - a key to high capacity cellular networks" (Tynderfeldt 2003)

D1 and D2 were marked as X-documents in the International Search Report. They both show the use of additional/dummy bursts in a broadcast channel for base station identification. However, they do not show the channel state check and the conditioned transmission of the base station specific training sequence.

Therefore, the cited documents represent the general state of the art.

The invention defined in claims 1-21 is not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed method and apparatus for channel state conditioned transmission of dummy bursts on a broadcast frequency, which dummy bursts comprise a base station specific training sequence, which enables base station identification. Therefore, the claimed invention is not obvious to a person skilled in the art.

Accordingly, the invention defined in claims 1-21 is novel and is considered to involve an inventive step. The invention is industrially applicable.
